Preamble

Background

The [OSC Service Commitment](#) was established to provide investors, registrants, and market participants with transparency on the standards and timelines they can expect when interacting with the OSC. As part of our ongoing commitment to accountability and transparency, this quarterly report has been created to provide timely updates to stakeholders on our performance against these targets. This report covers the period from January 1 to March 31, 2023, and includes the service standard updates [effective](#) July 1, 2022 and the subsequent changes to prospectus standards [effective](#) January 9, 2023.

Performance Measurement

Each service standard has a corresponding **performance target**; this represents our commitment to the service level that stakeholders can expect when interacting with the OSC. The performance target generally applies for routine matters and assumes that applications and filings are received in an acceptable form. For more information on what this means, refer to the full [OSC Service Commitment](#) document on the OSC website.

Performance results against each standard are collected and presented on a quarterly basis for greater transparency.

Notice on Service Timelines

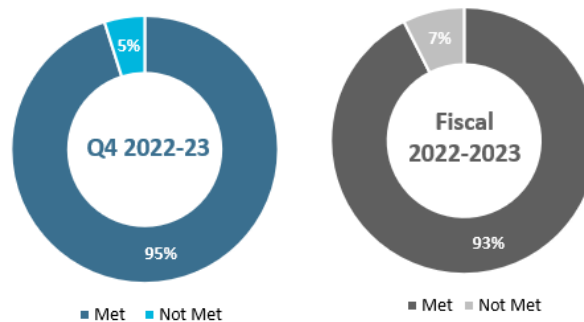

On December 7, 2021, in response to a significant and persistent increase in the volume and complexity of certain applications and filings, the OSC [announced](#) temporary changes to its service commitments. Performance results were measured against these temporary changes beginning on December 7, 2021, and are reflected in the Q4 2021-2022 and Q1 2022-2023 results of this report.

Effective July 1, 2022, the [OSC announced](#) several updates to its service targets and timelines as a result of its [annual service commitment review](#), this includes extending the temporary changes announced on December 7, 2021. These changes are reflected in the results starting Q2 2022-2023.

Subsequently, in response to decreasing levels of market activity, the OSC [announced](#) that, effective January 9, 2023, it will be ending the temporary targets and timelines for prospectus related standards¹, in favour of the prior targets and timelines. Current prospectus volumes are now consistent with pre-pandemic levels. These updates are reflected in the Q4 2022-2023 service standard results.

As this report covers five fiscal quarters of performance results, all temporary and updated service standards including their effective dates and, if applicable, end dates are flagged throughout this document.

Summary of Results

In Q4 2022-2023, staff continued to provide a high level of service to our stakeholders. There were 41 service standards applicable for measurement this quarter, representing services requested. Where a service is not requested (e.g., no applications), the measurement is N/A and not included in the total number of service standards met/not met. Overall, for services requested, the OSC met or exceeded 95% (39 out of 41) of its quarterly performance targets in Q4 2022-2023. We have provided explanations for all Q4 standards that were not met; for any prior quarters, please refer to the corresponding quarterly reports.

In summary, for the 2022-2023 fiscal year, the OSC met or exceeded 93% (149 out of 161) of its quarterly performance targets for services requested.
